

# Group 2S (ID-13): **CTF x Trivia**

By Théophane Mayaud, Basile Spaenlehauer and Laurence Bongrain

# App overview

## TriviaGo:

- Gaming App
- Available on Tablet with additional features on Smartwatch

## Evolution of the game:

01

Creation of the game  
and waypoints

02

When all the players  
joined, each choose and  
travel to a first waypoint

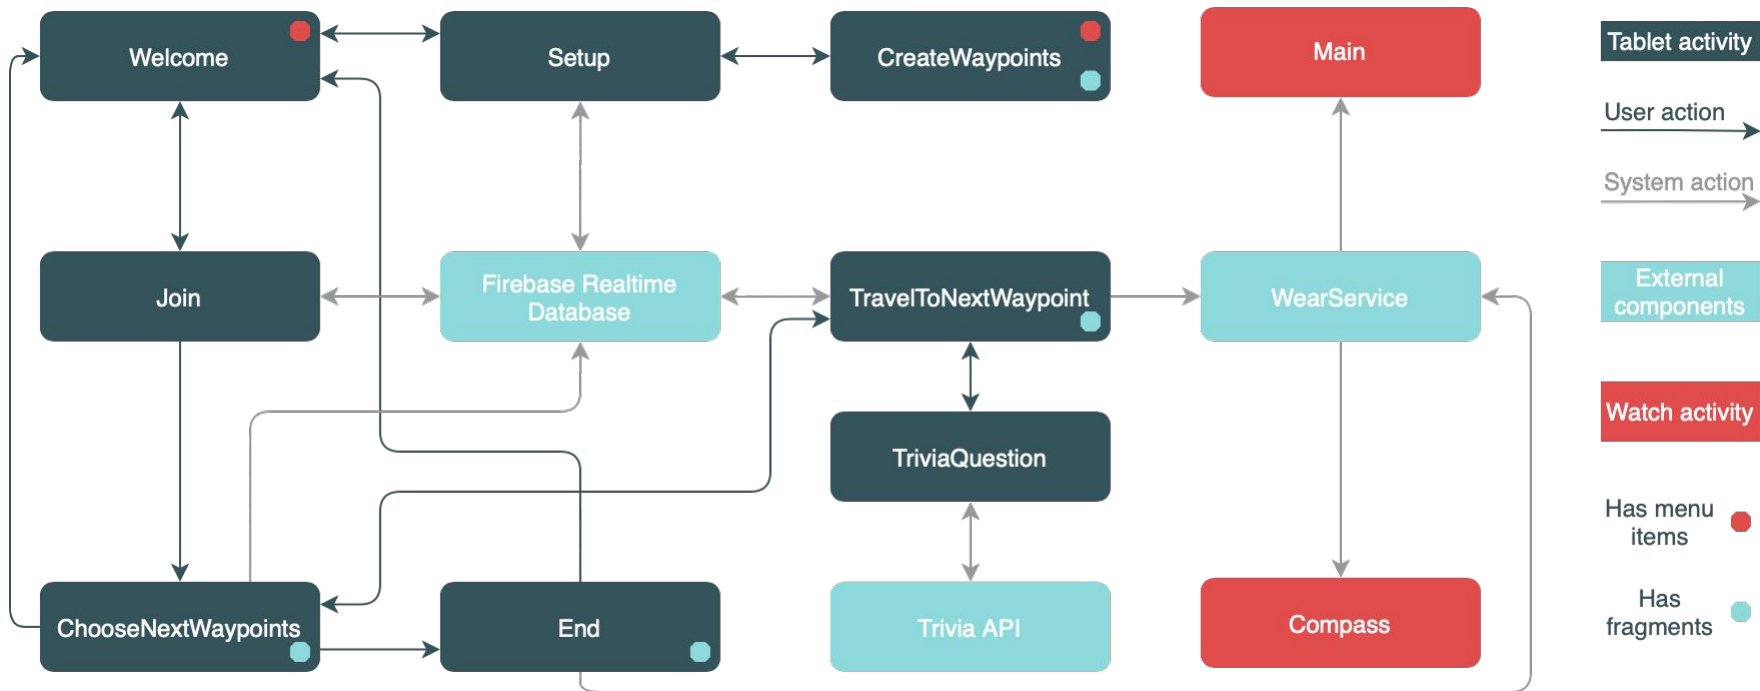

03

Trivia questions are  
asked for each  
waypoint reached

04

Once all checkpoints are  
completed, the game is  
over

# Block Diagram

# Work division

# GUI approach

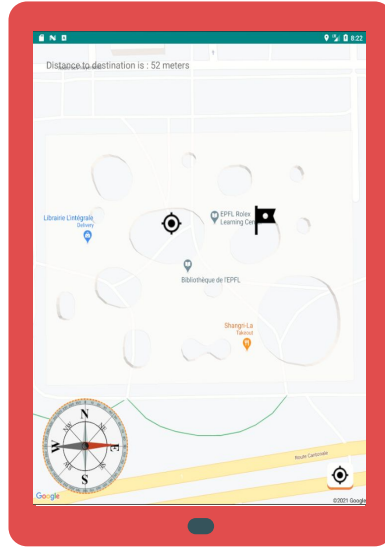

Architecture &

Design

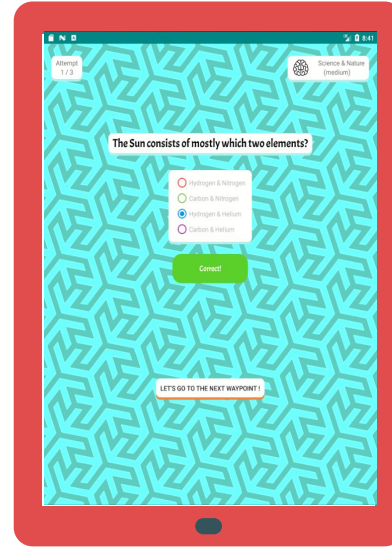

#E68A3A

Clickable

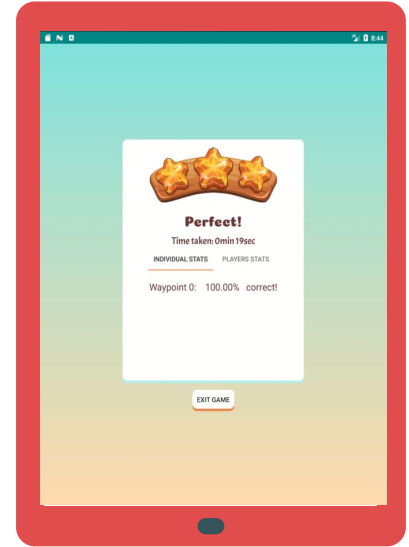

#BAF1ED

Non Clickable

- Multiple layers
- Multiple layouts

- ViewPager
- ScrollView
- Dynamic TextViews

# Components & libraries

Architecture &

Design

02.03

## Retrofit:

- REST Client for Java, handles the TriviaAPI calls based on a Model and a Converter

## Wear Service:

- Enable tablet - watch communication

## Firebase:

- Used to store game datas (ex: settings, players, ...)
- Keep track of players locations
- Deletes the game when all players are done
